

Hackers Anonymous Scrum Notes for Sprint 3

Scrum meeting on November 7th 2019:

- Connect front end and back end.
- Break down epics into more tasks.
- Jack and Cody working on backend again.
- Implement user registration.
- Meet with product owner on Monday.
- Prioritize tasks.
- Evan will work on Vue front end.
- Jack will finish move tests.
- Added many more front end tasks.
- Patrick and Evan will work on database.
- Better organize kanban board.
- Kareem will do client side tests.

Scrum meeting on November 16th 2019:

- Work on project as a team from 10 a.m until 5 p.m.
- Cody and Evan are reorganizing the back end for ease of use.
- First linking on backend and frontend successfully created.
- Add networking epics and issues to repo.
- Game piece images are now being displayed on the gameboard.
- User registration is now working. Only a few additions needed to fully complete the database.
- Selected piece now has a yellow background.

Scrum meeting on November 21st 2019:

- Work on networking aspects of the game over break.
- Refactor back end.
- Database is now complete.
- Finish front end over break.
- Work on project as a team.
- Redesign game pieces. Using traditional chinese characters makes the game hard to play for most users.

Scrum Meeting on December 6th 2019:

- Work on remaining parts of the project.
- Put together presentation.
